

SUPPLEMENTARY INFORMATION BOOKLET
(PERTAINING TO THE E-WASTE RULES)

PROPER HANDLING OF THE AIR CONDITIONER

Under the E-waste (Management) Rules, 2016 ("**e-waste Rules**"), it is necessary for the e-waste to be properly channelized till the stage of its recycling and final disposal. Improper handling and dumping of e-waste in landfills contaminates the soil and the water resources. Hence, it is imperative that the electrical and electronic equipment's that are rendered useless on account of the end of its life or any accidental breakage or damage, is disposed off in a manner that is not detrimental to the conservation of the environment and does not cause any health hazard to any living beings. With a view to attain this objective, certain responsibilities have to be borne by all the concerned stakeholders including the producer, dealer, dismantler, recycler and also the consumer, involved in the production, use and disposal of the electronic equipment's.

Please be aware that you are a responsible consumer under the e-waste Rules. Kindly take note of the symbol below which connotes that you should not dump any of the electrical and electronic equipment's including Carrier air-conditioners in garbage bins, neither should you dispose off the same through any scrap dealers.

ANNUAL MAINTENANCE CONTRACTS

Our air conditioners contain various components and inputs that are technical in nature and it is important that any repair or replacement of any of the components of the air conditioners is done only by the personnel authorized by Carrier. We recommend that you avail annual maintenance services by Carrier, in order to optimize the performance and the life span of your air conditioners and also to ensure their safe and proper handling.

COLLECTION CENTRES

We have set up a collection centre and several collection points for the collection of the e-waste that gets created at a stage when the air-conditioner is no longer usable and is intended to be discarded by you. The contact details of our authorized collection centres are as follows-
